(54) Title: METHOD FOR OPTIMIZING THE POSITIONS OF STANDARDS ON MALDI TARGETS FOR MASS SPECTROMETRY

Figure 1: MALDI target.

(57) Abstract: The invention relates to the field of molecular mass measurement by time-of-flight mass spectrometers where the ionization of analyte substances is produced by matrix-assisted laser absorption (MALDI). Methods for the correction of flight time values based on the use of external standards are provided, and in particular methods for determining, given a MALDI target, the optimal positions of mass calibration standards are described.

INTERNATIONAL SEARCH REPORT

International Application No

EP 03/04005

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 H01J49/16

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 H01J

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, INSPEC

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 6 287 872 B1 (SCH UURL RENBERG MARTIN ET AL) 11 September 2001 (2001-09-11) claim 1	1, 17
A	US 5 886 345 A (HOLLE ARMIN ET AL) 23 March 1999 (1999-03-23) cited in the application claim 1	1, 17

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- * & * document member of the same patent family
